

RESOURCE ADVISOR⁺

A New Set of Vital Signs is Defining Business Health

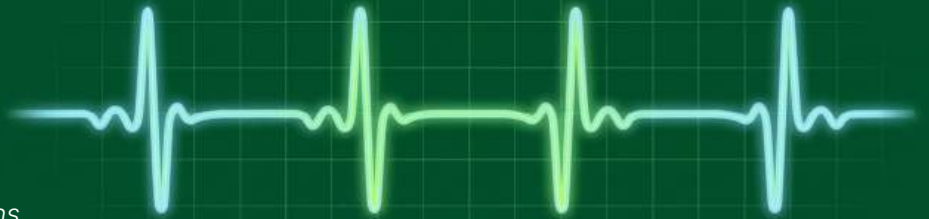

For decades, business health meant one thing: the financials. But the most resilient companies in the world now know that revenue and margin only tell part of the story. The other critical part of the story lives in your emissions data, your supplier relationships, your energy spend, and your exposure to a changing climate.

A company can look healthy on paper while pressure builds everywhere else. **Energy, emissions, supply chain, and climate risk data reveal the vital signs leaders need to protect performance over time.**

The New Vital Signs:

- Energy costs and availability
- Supply chain engagement
- Carbon emissions
- Climate risk exposure
- Resource efficiency

These are rapidly becoming the new vital signs of a resilient and healthy company. They're also the metrics your board, regulators, customers, and investors are watching closely.

27%

Already 27% of companies disclosing on water report withdrawing from water-stressed areas, a sign that resource scarcity is shaping strategy.¹

30-40%

The year over year rise in wholesale electricity prices across the EU and U.S. in H1 2025.²

\$1.2 Trillion

The cost of climate change's physical impacts on the global economy in 2024 alone.²

26x

Supply chain emissions are 26x greater than direct operations — yet only 15% of companies have set a target to address them.³

RESOURCE ADVISOR⁺

A single platform, multi-product ecosystem, to solve today's problem and connect tomorrow's strategy.

Sustainability Product Family

Track your complete carbon footprint, model decarbonization scenarios, and turn complex compliance into confident action.

Climate Risk

Reporting & Compliance

Carbon Performance

Supply Chain

Energy Product Family

Streamline complex utility accounting, optimize procurement strategy, and hedge against volatile energy markets.

Meet Sera

As an always-on intelligence partner, Sera brings together a network of specialist AI agents and decades of Schneider Electric expertise turning complex data into action.

Think of Sera like your sharpest new hire: the one who knows who to call, what to ask, and how to bring you an answer you can actually act on. Ask her about Scope 3 Category 6, the latest CSRD requirement, or why last month's utility bill looks off, and she'll handle it.

Behind the scenes, Sera coordinates with a network of specialist AI agents, each trained in a specific domain like emissions, reporting, or invoice validation.

A Note About Data and AI:

- We normalize, validate, and trace data from the start
- Data is encrypted - there is no data sharing or model training
- Frugal and energy efficient AI uses the right model for the job

Sera

Here is a recommended scenario with a mix of revised initiatives to account for the increase in direct fuel and energy use. You can make edits to the scenario afterwards.

Recommended Scenario:

Enhanced scenario with accelerated initiatives to bridge the 14% gap and achieve the original 80% reduction target at Umbrella Corporation by 2035.

Scenario Name: Umbrella Corporation Nearshoring Impact Q2_2025

Cap-Ex: \$35M USD **Op-Ex:** \$5M/year **Ease of Implementation:** Medium

Speed of Implementation: 4 Years **Magnitude of Impact:** 2 Mt CO₂e/year

Strategy, Software and Data Finally in One Place

The hardest part of energy and sustainability efforts isn't the software or the strategy - it's *connecting* the two. Resource Advisor+ brings AI-native software and proactive strategy together in one place, breaking down the wall between the tools you use and the unparalleled expertise you need to succeed.

✓ **Recognized by analysts**
Named a leader in recent Carbon Management and Sustainability reports by IDC and Verdantix.

✓ **Designed for full workflows**
From data integration to disclosure, reporting, validation, strategy, and performance tracking all run in connected workflows.

✓ **Infused with proven expertise**
The product reflects the earned wisdom of our advisory teams, turning decades of experience into intelligent workflows.

✓ **Data you can defend**
Every number, calculation, and recommendation is traceable, reproducible, and audit-ready and built for the scrutiny.

From Independent to Fully Supported — You Choose

Every sustainability program is different. Choose the engagement model that fits your team today, and shift as priorities evolve.

For companies who lean towards a do-it-yourself approach, or want to empower their own sophisticated teams to use Resource Advisor independently.

For companies looking for guidance on how to get set-up, integrate their strategy with Resource Advisor and define a thoughtful path forward with regular check-ins and support.

For companies who don't have the internal capacity but want to maximize their Resource Advisor investment. Schneider Electric experts serve as an extension of your team every step of the way.

The signals are there.
The strategy starts here.
